

Call for Abstracts - 2024 SNO/ASCO CNS Metastases Conference

The SNO/ASCO CNS Metastases Conference — *Leveraging Multi-Sector Collaboration to Disrupt CNS Metastases* — will be held August 8-10, 2024, at the Sheraton Denver Downtown Hotel in Denver, Colorado.

The call for abstracts for the 2024 SNO/ASCO CNS Metastases Conference is now open. The submission deadline is on **Monday, April 8, 2024, at 11:59 PM ET.**

All accepted abstracts will be published as submitted in an online supplement to SNO's official journal, *Neuro-Oncology Advances*. To submit an abstract, [click here.](#)

The surgical management of diffuse gliomas: Current state of neurosurgical management and future directions

After recent updates to the World Health Organization pathological criteria for diagnosing and grading diffuse gliomas, all major North American and European neuro-oncology societies recommend a maximal safe resection as the initial management of a diffuse glioma. For neurosurgeons to achieve this goal, the surgical plan for both low- and high-grade gliomas should be to perform a supramaximal resection when feasible based on preoperative imaging and the patient's performance status, utilizing every intraoperative adjunct to minimize postoperative neurological deficits. While the surgical approach and technique can vary, every effort must be taken to identify and preserve functional cortical and subcortical regions. In this summary statement on the current state

of the field, we describe the tools and technologies that facilitate the safe removal of diffuse gliomas and highlight intraoperative and postoperative management strategies to minimize complications for these patients. Moreover, we discuss how surgical resections can go beyond cytoreduction by facilitating biological discoveries and improving the local delivery of adjuvant chemo- and radiotherapies. This Week's Featured Listing

Join the Neuro-Oncology Division at Barrow Neurological Institute (BNI) in Phoenix, Arizona. BNI is a focused neuroscience institute and internationally recognized leader in neurology and neurosurgery, neuro-oncology, neuroradiology, and translational neurobiology for neurological care, residency and fellowship training, and research. Drawing patients from the entire United States, Mexico, Canada, and worldwide, we are a multidisciplinary team of neuro-oncologists, neurologists encompassing 13 subspecialties, neurosurgeons, radiation oncologists, speech-language pathologists, ENT specialists, and head and neck surgeons, offering the latest treatment for neurological diseases, head and neck cancer, and metastatic cancers. Our neuro-oncologists work closely with research scientists from Ivy Brain Tumor Center. [Click here to apply or see other postings!](#)

The PROSPECT Study Is Enrolling at 43 Study Centers Across the US

For eligible patients with newly diagnosed or relapsed/refractory PCNSL
